**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

1. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- Group I, claims 1-3, 5, 6, 11 and 13-15, drawn to a method for separating chemical substances or particles or combinations thereof which phases in *parallel* with a phase boundary. Class 210, subclass 634.
- Group II, claims 4 and 12, drawn to a method for the separation of chemical substances or particles or a combination thereof, comprising a *microfluidic system* with phases *perpendicular* to the phase boundaries. Class 210, subclass 748.
- Group III, claims 7-10 and 16-18, drawn to a device and use of the device for the separation of chemical substances or particles or a combination thereof, comprising a microfluidic chamber that can be filled with at least two nonmiscible fluids or gels. Class 204, subclass 554.

The inventions listed as Groups I - III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I - III share the feature of separating chemical substances or particles by applying an electric field. Theos et al. (*Electroextraction Two-Phase Electrophoresis*, 1995, included in applicant's submitted prior art of record) and Weigl et al. (US 6,541,213) both teach separating substances by applying an electric field. Therefore, the common feature between the two groups, separating chemical substances or particles by applying an electric field, does not provide a contribution over the prior art, and, thus, cannot be a special technical feature. Therefore, Groups I - III do not relate to a single inventive concept under PCT Rule 13.1.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

A telephone call was made to applicant's attorney, Daniel J. Hudak, Jr. to request an oral election to the above restriction requirement, but did not result in an election being made. Since applicants have filed a request that this case be considered for participation as part of the First Action Interview Program, Mr. Hudak was informed that

the election must be made without traverse for this application to remain eligible for the First Action Interview Program.
